Dave's Technical Tip

APPLIANCE DATA PLATE – MARKING OF APPLIANCES

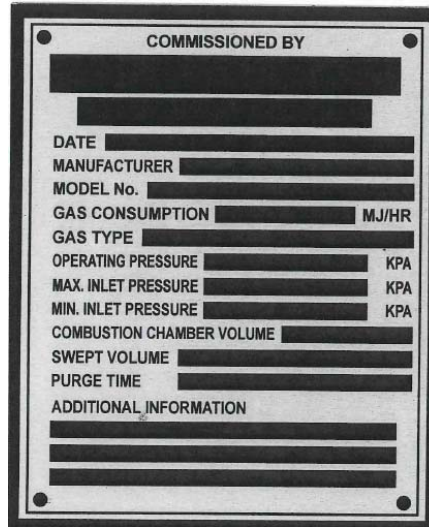

Gas appliances are required to be marked/identified, in English, with the following minimum information.

1. The name or registered trade name of the manufacturer or NZ supplier.
2. Specific type and model of appliance.
3. Type of gas or gases that the appliance can safely operate on.
4. Maximum and minimum gas supply pressures for safe operation.
5. The maximum overpressure if less than 7kPa NG or 14kPa LPG.

The input rating /gas consumption of the appliance.

System Control Engineering provide a self adhesive aluminum data plate, dimensions 110 x 90 mm, pre-printed with the above categories for the appliance supplier to etch or stamp the relevant data.

Please order part number Z0138 if you require data plates for installations with appliances subject to one-off approval.
