# TECHNICAL TIP

As we always remind people at this time of year "LPG safety" is the word. With caravans, camping gear and boats being dragged into the light of day, it always pays to check things over carefully to ensure that a trouble free summers enjoyment will be had by all. Not to mention ensuring compliance with the relevant regulations is upheld.

Boating NZ magazine have just published an article in their September magazine highlighting the areas of concern for the boating industry and points of interest to look out for.

The thing to remember is' **IF YOU ARE NOT SURE, GET IT CHECKED** ' all work of this nature should be carried out by a suitably qualified tradesman.

The crew at System Control in RWC mode. Due to having such a range of origins in house, we thought this would be a good idea for casual Fridays.
